- Driving
- Sport

About Me

I am a junior Frontend Developer with a strong motivation to learning and discovering in frontend development. During one year course I learned the base of programming then started JavaScript as a professional language; beside of it I learned Backend skills and worked on it but actually frontend is much more attractive for me. Here I mentioned some projects and I didn't write unrelated experiences; although I have more than 20 years experiences in other fields.

Education

DCI - Digital Career Institute GmbH Berlin (Certificate)
Web Development Course (August 2022 - August 2023)

Azad University Iran (Bachelor's degree)
English Translation (September 1998 - July 2002)
